More Than Just
...Washroom Hygiene

About us

Washrooms have long been a breeding ground for germs and diseases but AQUAIR offers products that can make every washroom hygienic, user friendly and self maintained. We at AQUAIR also understand that customers have their own specific business requirements thus all our products are designed to suit them.

We are solution providers for Away From Home (AFH) washroom. AQUAIR provides a comprehensive range of washroom services, which delivers top-end washroom products that aims to enhance your washroom experience. Our range of services includes air fresheners, Air Sanitizers, WC and Urinals Sanitizers, Toilet Feminine Hygiene Units, Soap Dispensers, Door Handle Sanitizers, and Hand drying systems.

Our proactive washroom services from our trained and uniformed staff are designed to ensure your needs are consistently met to a high standard. We concentrate on ensuring that our washroom hygiene solutions meet your budget requirements.

FEM-IGENE

Designed only
...because we care

FEM-IGENE

Feminine Sanitary Dispenser and Disposal System

FEM-IGENE, is designed to help you provide an enhanced washroom experience to your female users.

Sanitary Napkins are un-dissolvable. Therefore, flushing them down the drain would create blockage and disposing them in the normal bins would emit a foul smell creating an unhygienic environment in washroom. Safe disposal of feminine sanitary waste is vital to any workplace washroom. As a part of our feminine hygiene systems we present

FEM-IGENE, a unique Feminine Sanitary Dispenser and Disposal System.

Sanitary Dispenser System

It is a space-saving revolutionary system armed with a special design mechanism, which dispenses a single clean, dry sanitary napkin at just a touch of the button.

- Discreet intimate design
- Refillable with its own indicator window
- Compact size L 5.9" x W 5.0" x H5.3"
- Capacity: 12 -16 Napkins
- Made of recyclable plastic
- Suitable for all brands and sizes of sanitary napkins (pads)

Sanitary Napkin Disposal Systems

This unique disposal system is made from biodegradable plastics.

FEM-IGENE slim, elegant design suits the smallest of the washroom cubicle.

The one-time use cartridge are inserted into the cylinder and then disposed in its entirety after use, with normal refuse.

Cartridges already contain pre-inserted biodegradable chemicals, an antiseptic agent proven effective against human immunodeficiency virus (HIV) in laboratory trials. The blend of odour neutralising agents and essential oils controls odours generated within the bin and prevents emission.

The product meet of Carbon Footprints conditions

1. The product has a significantly lower carbon footprint compared to similar products currently available on the market
2. By using the product, it will help other people or organisations reduce their carbon emissions.

Aroma that leaves
...lingering freshness

AIR CARE

Automatic Aerosol Dispenser

ACE Micro Aerosol Dispenser is an exclusive product with patented features to suit every condition and ensuring that the air is malodour free and the unique fragrances influence the mood and ambience of the environment.

VELTIA

New Generation Hand Dryer.

This innovative hand dryer removes all the water from your hands in less than 15 seconds. The novelty, is its path breaking technology which employs an air stream with a high speed up to 120 mph. The VELTIA can replace two very important installations in the washroom, the conventional warm air hand dryer and the paper or cloth towels dispenser, thus eliminating any recurring expenditure

The highlights of the VELTIA hand dyers are:

- (1) It dries your hand which using warm/hot air.
- (2) It consumes 85% less energy than the conventional warm air dryers.
- (3) It dries your hand in 15 seconds flat and gives a soft feel after use.
- (4) No need to use a paper/cloth towels, hence save cost and is ecological.
- (5) Easy to maintain and added aesthetic value to the ambience and high-end washroom.

And you thought urinals
...could only smell bad

WASHROOM CARE

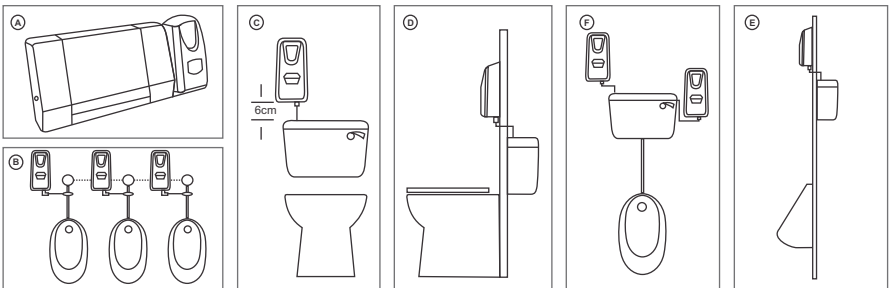

ACE Micro Dosing Systems for Urinals and WC.

ACE MICRO DOSING SYSTEMS includes WC and urinal sanitizers and are designed to create a fresh hygienic environment right through the system resulting.

The unpleasant odour generating out of urinal pots is not caused due to the unclean surface of the urinal but the drainage pipe of the urinal. The urinal pots and WCs become hidden breeding grounds for stubborn bacteria and fungi that increase the risk of infection. Another possibility is that of urine salt deposits leading to malodour emitting urinal pots and WCs. The salt deposits over time also result in clogged drainage pipes. Rectification of such blockages is cumbersome and expensive.

These hidden problems cannot be flushed away merely by cleaning the urinal pots and WCs. ACE MICRO DOSING SYSTEMS offers a perfect solution by dispensing chemicals into the water flow eliminating even the most stubborn bacteria. It dissolves the urine salt deposits and flushes it out of the drainage system and also forestalls further deposits. This ensures that the source of potentially unpleasant odours and infections is thoroughly eliminated.

The installation options are:-

Easy to use

HAIR.BODY.HAND CARE

ILLI – Dispenser and Cartridge Systems

ILLI is an innovative dispenser etched in a timeless design. Taking into consideration factors like economical competitiveness, personal hygiene, cleaning and maintenance of the dispenser, this functional design offers a three-component solution: a housing, a bottle and a cover.

The ILLI cover front comes in three standard colours and can be customized to suit the user's taste. The refill cartridges contain liquid Hand Soap or Hair.Body.Hands, both developed to meet the highest requirements of today's modern skin care.

The refill bottle is equipped with a cap that makes the dispenser completely drip free. The bottle can be installed in the dispenser in seconds.

Advantages of ILLI

- Ÿ Simple and flexible mounting with screws or double face tape.
- Ÿ The refill bottle is installed in the dispenser in seconds.
- Ÿ Easy to monitor and check the product level in cartridge.
- Ÿ Cartridge is completely emptied resulting in nil product wastage.
- Ÿ Easy-to-clean and withstands daily use.
- Ÿ Unbreakable, without any metal parts.
- Ÿ Lightest empty cartridge bottle in the market, only 35 gram (incl. capsule).
- Ÿ Lockable feature for the cartridge.

Handle which Cares
Door Hygiene

HYGIENIC DOOR HANDLE

100% of the people use washrooms

30% do not wash their hands after using the washroom

66% do not use the soap in the washroom

84% do not use soap long enough to kill germs

88% of infectious illness is transmitted by touch

but 100% do use the door handle to exit the washroom

PURLEVE Hygienic Door Handle has an automatically advancing antimicrobial* material to cover the handle, providing a refreshed, sanitary touch after each and every use. So visitors to restrooms and other public areas are no longer affected by the questionable hygiene habits of all the persons who have gone before them.

Purleve is as simple as it is smart, functioning and reacting exactly as regular door handles. Better health. Better image. Better manners. Better business. Clean is better, all the way around. And Purleve helps to make "clean" the last word in washroom hygiene.

Highlights of the PURLEVE

- Purleve can replace any of the existing door handles and is vandalising proof
- The simplicity of the product results in a non-existent learning curve for patrons, as Purleve door handles function and react exactly as regular door handles
- Advancing an antimicrobial-treated sleeve with every use reducing the amount of disease-causing germs and bacteria
- Purleve handles installed on the door helps to create a superior facility image, providing visitors assurance that they're visiting a healthy environment within an establishment that caters to the well-being of their patrons
- Preferred in washroom wherein the costly paper towels is absent. It is particularly important in establishments that require more sanitary conditions.
